## Unidumptoreg V1.1b5

Unidumptoreg v1.1b5 does not support glasha files (HLMON), only supports Glasha key (Hasp4), if some editing in reg then Unidumptoreg. reg in the game folder will not work. Unidumptoreg.vdf will work, but unidumptoreg.reg with unidumptoreg.vdf will not. The archive contains Unidumptoreg.vdf and Unidumptoreg.reg. Run unidumptoreg.reg, select the path where you installed Glasha and click save. Don't forget to check "All Files", then open Unidumptoreg.vdf and add the path to the appropriate fields, and then in the "Select Files" window click "Select Files". Attention! you must select all the files that are in the archive.
